Ames Auto Wrecking, Inc.
P.O. Box 325
Bremerton, Washington..98310

Gentlemen:

C
O
P
Y

After an inspection of your refuse disposal site on the morning of September 25, 1969, the health officer, Dr. Benham, and the writer, concur with Mr. Marler that you should acquire some expert help to design a method of operation for your disposal site. We feel that this is probably a new business for you and that you do not have all the answers as how best to dispose of the large quantities of solid waste you receive daily. If you expand upon the specifications in the accompanying letter you should be able to adequately dispose of the waste, but you probably should hire a competent, knowledgeable person to assist you. Good plans and detailed specifications are essential for proper operation of a disposal site. Your site has been the center of controversy since July of this year, with no real progress towards correction of the problem being made. You are hereby directed to proceed immediately with plans to operate your site properly.

Upon compliance with the specifications and requirements noted in the accompanying letter, and subject to inspection and approval by the health officer, your permit to operate will be issued. In the event your refuse disposal site cannot meet the specifications set forth and the approval of the health officer, your money will be refunded and no permit will be issued.

If you then continue to operate as refuse disposal site you will be charged under Kitsap County Ordinance Number 32 for operating a refuse disposal site with no permit.

Please answer in writing, giving us the date by which you intend to be in complete compliance with Ordinance Number 32.

Very truly yours,

DEPARTMENT OF PUBLIC HEALTH
Bremerton-Kitsap County

J. A. Weigel, R.S.
Director
Division of Environmental Sanitation
